

Two Couples Honored by District Residents

More than 120 residents from the Wainwright district showed their appreciation Friday night, October 15, of the work done in their community by two couples who are leaving for the Pacific coast. The honored guests at the reception in Wainwright were Mr. and Mrs. T. C. Sanders of Irma, and Mr. and Mrs. H. E. Spencer of Edgerton. Both families moved into the district many years ago by oxen and cart and since that time have played a valuable part in the progress of the district. Left to right they are Mr. and Mrs. Sanders and Mrs. and Mr. Spencer.

Glen-Coa Gleanings

Glen-Coa community wishes to offer its earnest congratulations to Misses Solveig and Arlene Steffensen who graduated from the university of Alberta in the fall ceremony on October 23. Solveig now has her B.Ed. and Arlene her B.Sc. Best of luck, girls, in your future careers.

Mr. and Mrs. T. Larson and two small daughters spent a few days recently at Brooks visiting Mr. and Mrs. O. P. Larson. We understand the pheasant shooting was tops.

Miss Lilly Nelson managed to get a visit at her home last weekend.

Mr. and Mrs. Marvin Reitan, accompanied by Miss Arlene Steffensen, Mr. Berge Gulbraa and Mr. O. Likness, motored to Camrose last Monday to take in the opening service at the Lutheran Bible Institute.

Sharon congregation has contributed the fine sum of \$79.00 thus far to the British and Foreign Bible Society.

Mrs. N. Fluevog spent a few days in Wetaskiwin recently as the guest of her sister, Mrs. T. Lyse. She also spent a day in Edmonton with her brother, Mr. E. Egedahl.

Mr. and Mrs. P. Nelson, Mrs. L. Hollings and Gordon plan to motor to Edmonton this week-end. Due, perhaps, to the wonderful fall weather, Edmonton Circuit Convention of the Evangelical Lutheran Church was an outstanding success. To say the ladies were busy is putting it mildly, as they served dinner both Saturday and Sunday in the church basement. A fine number of guests were present from the various congregations of the circuit. The guest speakers Rev. Grundahl of Camrose, Rev. Johnson of Ryley, and Prof. Mol, principal of Camrose Lutheran college, brought thought-searching addresses on "The Christian Church." Special musical selections were given at each session. After the business session on Saturday morning we were privileged to hear a fine message from the district stewardship secretary of the church, Rev. M. Odland of Weldon, Sask. A Sunday School institute followed where the following topics were discussed: The Relation of the Sunday school to the church; Qualifications of the Sunday school teacher; the Bible class in the Sunday school.

"We won't have Communism as long as the population of Quebec remains what it is—French and Catholic." — Mayor Camille Houde.

"We are tending now to more pay for less work. This country was not built up on that basis." — W. J. Cairns.

M. D. Wainwright Council Minutes

The council of the municipal district of Wainwright No. 61 met in the council room of the municipal district on Thursday, October 14, 1948, at 9:00 a.m. Councillors Dailly, Spencer, Sutherland, Taylor, Smale, Arthur and Archibald present. Reeve Sutherland in the chair.

Taylor—That the minutes of September 9, 1948, be approved as written. Cd.

Arthur—That Clr. Smale be appointed deputy reeve for the next six months. Cd.

Smale—That the accounts as recommended by the finance committee and subsequent accounts passed by the council amounting to \$41,277.64 be paid. Cd.

Sutherland—That the statement of receipts and expenditures for the month ending September 30, 1948, be accepted as read and incorporated in the minutes. Cd.

Archibald—That the secretary collect from the Town of Wainwright monies due the municipal district with reference to Wainwright's Central Park, Plan 1155 A.E. years 1938 to 1947 inclusive. Cd.

Sutherland—That the cancellations amounting to \$84.05 be approved. Cd.

Spencer—That the secretary be instructed to withdraw the following townships from the formal application under the Prairie Farm Assistance, 1948:

Township 44, Ranges 3, 4, 5, 6, 7, 8.

Township 46, Ranges 3, 4, 5, 6, 7, 8.

Township 47, Ranges 4, 5, and 6. Cd.

Sutherland—That the report from Winspear, Hamilton, Anderson and Co., interim audit for the period January 1 to August 31, 1948, be accepted, notations made and corrected.

Spencer—That the reeve and secretary be authorized to sign application for Certificate of Permanency on behalf of Charles Wilbraham, secretary-treasurer, relative to the revised regulations of the Unemployment Insurance Commission, 4th October, 1948. Cd.

Secretary reported that Income Tax and Unemployment Insurance auditors had checked the pay rolls of the municipal district and found same in proper order.

Matter of new assessment of \$1/2 28-45-2, account of river flood damage be held until spring of 1949. Smale—That the secretary be a committee with reference to F. B. Brewer, Foreman, Gregory and Croteau. Cd.

By-law No. 241 concerning the sale of the S1/2 2-47-6-4 to Ronald Babbs of Wainwright for seven hundred dollars cash presented.

By-law 241 passed its first, second and third and final readings. Sutherland—That Motions 360, 361, and 362 concerning the passage of By-law 239 be rescinded. Cd.

By-law 242 concerning the sale of the SE 10-42-1 to J. A. Varty of Ribstone for two hundred dollars cash presented.

By-law 242 passed its first, second and third and final readings. By-law 243 concerning the sale of the NE 15-44-5-4 to E. Massier as previous owner, presented.

By-law 243 passed its first, second and third and final readings.

Smale—That this council accept the offer of O. J. Dailly for the municipal granary at Ribstone for \$30.00 cash. Cd.

Taylor—That as this council receives applications for purchase of land at each council meeting in the vicinity of the Community Pasture area, that the Association be asked to provide the council with the definite boundary line, and advise when the council may expect the 1948 lease rentals. Cd.

Taylor—That W. E. Belton be engaged as a motor grader operator at a rate of 75c per hour when he is recommended by a councillor as an experienced operator the rate of pay shall be \$1.00 per hour and that he be advised to take over the No. 302 grader immediately. Cd.

Arthur—That John Ford be engaged as a motor grader operator at a rate of 75c per hour, and that he be allocated to the A.D. grader immediately. Cd.

Archibald—That S. Murray be paid at the rate of \$1.05 per hour as and from September 1, 1948, and \$1.15 per hour as and from October 1, 1948. Cd.

Archibald—That the recommendation of the public works committee to cancel Richardson order for two Model 666 rotary shovel snow ploughs be approved and secretary advise this company of said cancellation. Cd.

Smale—That the council place an order subject to cancellation with the Industrial Road and Equipment Co. for one Model 610 100 h.p. motor grader for 1949 delivery. Cd.

Archibald—That the first car of snow fence be allocated to the divisions as follows: Division 1, 14; Division 2, 16; Division 3, 13; Division 6, 10; Division 7, 10. Total 90. Cd.

Spencer—That the road through Section 21-43-4 be recommended for cancellation, the district having no use for this forced road. Cd.

Arthur—That Motion No. 376, 1948 be rescinded owing to error by the Alberta Association of Municipal Districts in quoting Board Order No. Cd.

Arthur—That this district comply with Order No. 5 of the Board of Industrial Relations, holiday with pay, and that the regular motor grader operators be advised. Cd.

Arthur—That the secretary file the municipal districts submissions with the board of transport commissioners for Canada with reference to railway crossings between sections 9 and 16-45-7-4. Cd.

Archibald—That the paysheets amounting to \$21,208.58 be passed and paid when signed by the councillors concerned. Cd.

Sutherland—That the report of G. W. Davis, police constable, Clear Lake area, 1948 season, be accepted, and that he be paid \$50.00 for services rendered. Cd.

Spencer—That the secretary prepare the necessary by-law for Herd Law in Townships 42 and 43, and that part of Township 44, south of the railway in Range 4 excluding Community Pasture area, and present same at the next meeting of the council. Cd.

No more business on hand, and on advice from Clr. Spencer that he was soon to retire from municipal life, Clr. Spencer was asked to adjourn the meeting.

Spencer—That the meeting adjourn. Cd.

Easterly Echoes

Mr. Arthur Likness motored to Edmonton for a visit of a week or more.

Collin Carter of Wainwright spent the holiday with his cousin Arnold Enger.

Misses Alice and Pat Enger were holiday visitors at the home of their aunt Mrs. A. Taylor.

Mrs. T. Sander, Mrs. E. Sanders and girls Harriet and Violet left by train for their new home at the coast. Messrs. T. and E. Sanders travelled by car for the same destination.

The Roseberry A.F.U. will meet on November 10th at 8 o'clock at the school. The lunch committee will be Mrs. Geo. Likness, Mrs. H. Adams and Mrs. Ralph King.

The Sew and So Club are the proud winners of \$20 in the Better Farm Home Competition sponsored by the Provincial Government. While not the first prize winners this is a creditable showing in 106 contestants.

The Battle River W.I. held a very successful bazaar and tea on Saturday last. The winners in the member sewing competition were first, Mrs. Ralph King and second, Mrs. Douglas Steele. We would like to say thank you to the judges, Mrs. J. C. McLean and Mrs. R. Larson.

Northern Nuggets

Don't forget the W.I. bazaar to be held at Albert school on Friday, November 12.

There will be a U.F.A. meeting at Albert school on Monday, November 1. A good attendance will be appreciated.

Mr. Gerald Currie has been visiting several old friends in the district this week.

Mrs. Leigh Currie has had her sister, Mrs. Wm. Brickman, visit.

Mr. and Mrs. Haakon Larson, Grace, and Mr. and Mrs. Alf Larson were recent visitors in Edmonton. Mr. Haakon Larson purchased a 1947 Chevrolet.

The last meeting of the W.I. was held at the home of Mrs. Raymond Ramsay. There was a good attendance and it was an enjoyable meeting.

(Too late for last week) Mr. David Currie of Edmonton was a weekend visitor at the home of Mr. and Mrs. Leigh Currie.

Mrs. Edgar Jones was a brief visitor in Edmonton last week. Mrs. David Smith has been visiting her parents, Mr. and Mrs. E. J. Jones.

Born to Mr. and Mrs. John Bars (the former Doris Knowles) at the Mannville Hospital on October 19, a daughter.

There will be U.F.A. pictures and speakers at Albert school at 8 p.m. on Wednesday, October 27. These men are from the head office, Calgary, and should have some valuable information to speak about. Everybody is welcome and ladies please bring lunch.

Don't forget the Buffalo Coulee W.I. card party and dance to be held on Friday, October 29th.

WANT ADS

FOR SALE

Six-piece dinette suite, walnut finish, like new. Mrs. Stanley Jones. 22-29p

WANTED

Man for profitable Rawleigh business. Must be satisfied with good living at start. Write Rawleigh Dept., WG-5-67-101, Winnipeg, Man. 8-29

FOR SALE

Electric washer—as new. Apply A. C. Charter.

FOR SALE

One complete 4 ft. 6 in. bed outfit, good condition. Mrs. John Ostad. 29p

FOR SALE

One Eaton barrel type hand washer, with wringer. In good shape.—Steve Ploker. 29p

FOR SALE

Well built grain box (for truck) equipped with loader. —L. H. Batts. 29-5p

NEWS ITEMS FROM JARROW

Mrs. Comar and daughter are here from the coast visiting with Mrs. Comar's parents, Mr. and Mrs. V. Lindberg.

Born to Mr. and Mrs. Clarence Meakins, a baby girl, at the Viking hospital, on October 24.

Mr. and Mrs. G. Theroux moved to Sedgewick last Sunday and visited with Mr. and Mrs. Wm. Theroux.

The road north of Jarrow is under construction at the present time. Just watch the Batts folks sail around next winter, snow or no snow.

Thieves entered Mel McCune's store early Sunday morning, removed the safe and got away with about \$2150.00. The bulk of the money was in checks. The police are busy on the case and it is to be hoped the thieves will soon be apprehended.

At the Churches

IRMA UNITED CHURCH

Sunday, October 31st Paschendale—11:15 a.m. Roseberry—3 p.m.

Irma Sunday school—11 a.m. Worship service—7:30 p.m. Topic "The Leaves of Life." The Rev. H. W. Inglis will be in charge. A hearty invitation to all.

"And he shall be like a tree planted by the streams of water, whose leaf also does not wither."

IRMA GOSPEL MISSION

11 a.m.—Sunday school and Bible class. 8 p.m.—Gospel Service. 8 p.m. Wednesday—Mid-week prayer meeting.

Pastor, Geo. E. Warnock. "Morality will keep you out of jail, but it won't keep you out of hell."

EVANGELICAL GOSPEL MISSION Public Services for week of October 28 to November 3

SUNDAY: 11 a.m.—Sunday school, classes for all. 7:30 p.m.—Evangelistic message.

TUESDAY: 8 p.m.—Bible Study and Prayer Meeting.

FRIDAY: (Nov. 5th) 8 p.m.—Young People's meeting. All are heartily invited to attend.

Pastor: R. E. Oswald. "The harvest is past, the summer is ended, and we are not saved. Is there no balm in Gilead: is here no physician there? Why then is not the health of the daughter of my people recovered?" Jeremiah 8:20, 22.

ST. MARY'S CHURCH NOTES Service of Evensong will be held in St. Mary's Church on Sunday, October 31st at 2:30 p.m.

The November meeting of the Irma W.I. will be held at Mrs. Rohrer's home on Thursday, November 4th. Mrs. Rohrer will have charge of the program. Mrs. Anquist the raffie. Hostesses Mrs. McLean and Mrs. Matwichek. Roll call will be "My Favorite Hymn." The Irma W.I. are holding their annual bazaar on Saturday, November 20th. This is a week earlier than in the past.

"Peace is our ultimate calling; not peace at any price, but the peace for which we strive and sacrifice is the peace of free men." —Wing Commander R. M. Frayne.

"But there is one thing I should like to extol and that is the harmony which exists between bar and bench in our country; judges never forget that they have come originally from the bar." —Chief Justice Thibaudeau Rinfret.

Items From Kinsella And District

Mrs. B. C. Carpenter and daughter Alice left last Tuesday for New Westminster to visit Mrs. Carpenter's mother.

The Student's Union sponsored their first Whist Drive of the season on Wednesday Oct. 20th. Winners were, Mrs. W. Brown, Mrs. R. Stevens, Mr. C. Overbo, Mr. A. Berezanski.

Visitors to Edmonton recently included Mr. and Mrs. F. Jack and family, Miss V. Barker, Mr. C. Barker, Mr. and Mrs. G. Paterson. Miss Audrey Barker was the weekend guest of her school friend Miss Dorothy Smith.

The monthly meeting of the W.I. will be held on Saturday, October 30th at 3 p.m.

The Community League will hold a meeting in the hall on Tuesday, November 2nd.

SHOWER

In honor of Mrs. C. McLaren, nee Miss E. Saunders, a shower was held on Tuesday afternoon in the school. This was sponsored by the teachers and pupils of Kinsella school. The gifts were presented to Mrs. McLaren in a miniature "McLaren's Truck." Drawn by Eunice Gayler and Elaine Jack, the truck was constructed by George Carpenter and David Brown and it was laden with many beautiful and useful gifts for the bride, who warmly thanked those present for the gifts.

A most enjoyable programme was put on by the pupils of the school during the afternoon, and it was much appreciated by those present. At the close a very dainty lunch was served.

We feel that the prompt action of Miss Nancy Shepka, teacher of Lynx school, well merits recognition. Her quick presence of mind prevented what might have been a tragedy. While Sam and George Steek were relaxing on a bench at a dance at Ross school, their car broke down and they decided to wait until day light to repair the damage. As it was a cold night they left the engine running. Miss Shepka saw the stationary car with the engine running and on investigation found the two boys unconscious. She tried to rouse them and failing to do so, shut the engine off, opened up the car and went for help. They were rushed to the Viking hospital by Mr. Tom Greenwood and attended to by Dr. Caldwell. We are pleased to report that both boys have recovered.

1947 Boom Year For Canada

OTTAWA.—A 22-year comparison of Canada in depression and prosperity shows that the nation's output rose from a low of \$3,468,000,000 in the bad times of 1933 to a high of \$13,375,000,000 in booming 1947.

The comparison of the country's economic health during the 22 years was given in a blue-covered booklet published recently by the Bureau of Statistics under the lengthy title "National Accounts, Income and Expenditure, 1926-1947".

It was the first time the bureau has carried the comparison back beyond 1938.

Salaries and wages totalled \$2,299,000,000 in 1928, dropped to depression low of \$1,791,000,000 in 1933 and then climbed steadily each year until they reached \$6,235,000,000 in 1947.

The volume of the nation's output of goods and services roughly doubled between 1939 and 1947. Farmers' income dropped by 86 per cent. between 1928 and 1933, partly because of the drought in the western provinces.

The farm income of 1928 was \$693,000,000 and in 1933 it was only \$88,000,000. By 1939, when it had risen to \$461,000,000, it was still 33 per cent. below the 1928 level. By 1947 it was \$1,235,000,000—more than 2½ times the 1939 total.

Vitamin "E" Used Successfully To Treat Diabetes

LONDON, Ont.—Dr. Arthur Vogelsang, one of four researchers who announced two years ago they had developed vitamin E to treat heart disease, disclosed the same vitamin has been used successfully to treat diabetes.

The other doctors who helped develop vitamin E are Dr. Paul Shute and his brother, Dr. Wilfrid E. Shute, both of London, Ont., and Dr. Floyd Skelton of nearby Ballymore.

Dr. Vogelsang said he and Dr. Wilfrid Shute have used vitamin E successfully in treating diabetes. Their clinical findings were identical, he said, in treating diabetes here and in Quelp, Ont. He had found some diabetes who did not respond to vitamin E but they had been effectively treated with operation.

Dispense With Insulin
The vitamin treatment had been used in conjunction with the insulin treatment, said Dr. Vogelsang, and some of the diabetes under his care had been able to dispense entirely with insulin dosages after eight to 12 months of vitamin E taken in pill form.

A wider diet and greater activity of the patient was possible with the vitamin treatment, whereas previous insulin treatment were reduced activity and a strict diet.

Gangrenous conditions, brought on by diabetes, can also be healed by vitamin E, said Dr. Vogelsang. Formerly amputation was necessary when insulin treatment failed to help a gangrenous condition.

Dr. Vogelsang said the full clinical method used in the diabetes treatment was presented before a recent meeting of medical experts in Montreal.

The first successful diabetes treatment, that of insulin, was developed by the late Sir Frederick Banting here and Toronto.

U.S. Recommends Less Wheat 1949

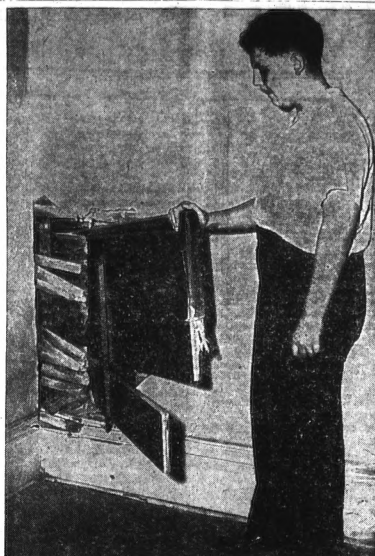

For the 1949 wheat crop, the United States Department of Agriculture has recommended an eight per cent. decrease in wheat acreage in that country. Based on an average yield of about 15 bushels an acre on 71.5 million acres, a total crop of 1.1 billion bushels would be harvested. This would be in line with estimated domestic, export and carry-over needs, the Departmental announcement stated.

Wheat acreage in the United States has increased during recent years to meet war and relief needs and the proposed seeding in 1949 seeks to bring adjustment in areas of low production without materially affecting total production.

Agricultural officials also point out that a reduction of wheat acreage will bring about a better balance between soil-conserving and soil-depleting crops and will actually assure higher productivity over a longer period of years. Farmers will be urged to provide for sufficient summerfallow, and to begin seeding to grass, land in marginal areas not suitable for sustained crop production.

Other considerations in recommending a decrease, are this year's carry-over, a probable 1948 crop the second largest in the country's history, and the possibility of reduced foreign demand because of improved crops in many importing countries.

"East Indian" mahogany is actually paduki; so-called "white mahogany" is prima vera.

RUNAWAY TRUCK ALMOST CRUSHES SLEEPING COUPLE—A runaway ready-mix cement truck crashed into the Hamilton, Ont., home of Thomas Beasley and pinned him and his wife so closely in their bed that the truck had to be pushed out before they could be released. It was a narrow escape for the sleeping couple as the truck struck with such force, a few inches more would have caused death. Here son John Beasley examines a section of the bed pushed through the wall into another room.—S.N.S. Photo.

DENTISTS USE PAINT OF FLUORINE

WINNIPEG.—Youngsters here are having their teeth painted to prevent decay. The "paint" is fluorine.

Dr. W. G. Campbell, director of Manitoba dental services, said dentists here and in surrounding areas were using the chemical.

"Winnipeg, unfortunately, has little fluorine in its water and it has to be applied by dentists. It is effective only on the young teeth of children." The dental service provides fluorine free. The treatment consists of four applications, painted on the teeth after they have been thoroughly cleaned and dried.

"Extensive period of the painting is about three years. Preliminary reports show it is effective," said Dr. Campbell.

He said his department took up the use of fluorine as a tooth preservative in 1947, when dentists were canvassed and told free supplies would be available to them.

Shave, Haircut Still Two Bits

MARIETTA, O.—There still is one town where you can get a haircut for 15 cents and a shave for 10.

It is nearby Lovell, a community of 1,000 residents, where William Ray has been in business with an old-fashioned wooden chair for 58 years. He's the town's only barber. Asked why he still was charging only 15 cents while barbers in this town were getting \$1, Ray explained:

"I just haven't had time to raise my prices. My business keeps me too busy."

Ray, working every day except Sunday from 7 a.m. to 9 p.m., clips an average of 300 heads a week.

Can Carried Letters Across The Atlantic

STORNOWAY, Outer Hebrides.—Dollar-short Britain is \$1.35 richer, thanks to the unpredictable Atlantic and the honesty of three boys.

The money was washed up on the shore of Lewis, largest and most northerly of the Outer Hebrides islands, in a red-white-and-blue can thrown from a United States tanker, Marine Leader, off the coast of Florida May 20.

The story of the adventurous can was told in a letter found inside it. The can contained letters addressed to persons in the United States. Most of the letters, apparently written by members of the tanker's crew, were stamped, but \$1.35 was enclosed with a note explaining that the money would cover any additional postage required. The crew had expected it to be picked up by a Florida fishing boat.

The boys, John MacLeod, Murdoch MacDonald and Angus MacDonald, found the tin floating along the shore of Portpatrick, one of the small villages of Lewis Island.

They reported their find and the letters have been despatched to their rightful owners. The money has been given to the Lewis hospital.

SHOES TOO VALUABLE FOR BOY TO DISCARD

ASTORIA, Ore.—Not even danger makes eight-year-old Jerry Montgomery forget the high cost of everything.

Jerry, a novice swimmer, fell from a bridge into the swift Necanicum river and started struggling toward shore. Someone yelled at him to discard his heavy shoes.

"No siree," he called back. "They cost too much."

The shoes and Jerry made it.

Finds Canadians Fond Of Bright Colors In Home-Decorating

MONTREAL.—Canadians are fond of bright colors in their homes. They're style-conscious about home decorating. And they don't hesitate to experiment.

This is what E. F. Evans, director and sales manager of a British domestic textiles firm, found in a two-month tour of Canada to sound out market prospects.

Evans thinks summer sunshine and four or five months of winter snow are the reasons for brightness of Canadian living rooms and bedrooms and boldness of design.

He's found similar taste for brightness in homes in Australia and South Africa which also bask under sunny skies for long periods.

As well as in homes, this liking for brightness shows up in clothing

Horse Fair In Britain Still A Busy Place

LONDON.—Because Britain is a hungry land, one of the oldest fairs to be held on the outskirts of London still is a bustling annual affair.

Nearly 2,000 horses and ponies changed hands at the three-day Barnet horse fair in north London, and more of them were bound for stewards and faying-pan than for harness or saddle.

The fair had its beginnings in the 18th century and there's still a colorful rural touch about it. Farmers in bright neckerchiefs and caps drive in to ponycars from remote Hertfordshire villages, and down-at-heel gypsies mingle with thousands of Londoners.

"I reckon most of these nags will finish up as steak or sausage," said one dealer. "Buyers turn them out to graze for a year or so and get them good and fat. They can get up to £80 (\$220) apiece for them at the slaughterhouse."

Statements like this draw horrified protests from the Animal Defence and Anti-Vivisection society. It decided recently to ask the government to reduce the controlled price of horseflesh for human consumption to sixpence (about 10 cents) a pound, so that the slaughtering of horses would be less profitable.

Some members say price control has little effect. The present controlled price in licensed shops is one shilling a pound but, they claim, it can be sold on the black market for 2s. 6d.

Horses for human food are killed in special slaughterhouses and their flesh sold at stores which deal in no other kind of meat. They stand in London's poorer districts, and often there are queues outside them.

Personality Changes In Dentist's Chair

CHICAGO.—Do you get that shaky feeling when you sit in the dentist's chair? If you do, blame it on your personality. It's undergone a change, Dr. Edward J. Ryan is the authority for the changing personality theory. He told about it in an address prepared for the American Dental Association annual meeting.

"The person in the dental chair is not the same person that he is on the golf course, at church or in the home," he declared. "The dental experience engenders certain unfavorable attitudes and reactions that are unique . . . the event is surrounded with fear apprehension and unpleasant emotions."

How scared you are of the dentist's drill doesn't make any difference whether you are a banker, a football player or a scientist."

—women's dresses in particular, he says.

He sums up the whole of it in what he calls a "new, young approach to things, a willingness to try new things out."

Naturally, Evans feels that there's a place in the Canadian market for British domestic textiles produced by firms such as his own.

He feels that British designers are old hands at interior decorating and that their products would go over well here because though styles may change, there's a standard of good taste that applies universally.

Started By Decoration
Some of the interior decorating in North America opened Evans's eyes.

In a restaurant where he lunched, he was startled by the size of a rose that was part of the decorative pattern on a wall. He left his lunch companion for a moment, went over to one of the roses and measured it for his personal satisfaction.

But British textile designers don't wait to be startled by new styles, he says. They keep up to date, or perhaps set trends with new designs and style changes.

In their business, there are some things that don't change much. Materials for the Royal Navy, for instance which have been tested for long experience and haven't altered "since the Crimean war", as Evans puts it.

Canadian taste seems to be the same from coast to coast though it may be that in British Columbia "quieter colors" are in favor, says Evans.

The young executive looks at Canada as a country at the door of a burst of development. "Canada is like a coiled spring," he says.

Until he saw Lake Louise he was convinced Rio de Janeiro harbor was the world's most wonderful natural beauty spot.

"I'm not so sure now," he says.

Postponement Of Growing Old

Researchers in geriatrics, the branch of medical science which deals with causes and postponement of growing old, estimate that by 1980 almost half the population of the U.S. will be made up of people over 45.

In 1940, at the last census, this group was 27 per cent. of the total. In 1900 one person in 25 in the U.S. was 65 years of age or older; by 1980 it's expected the proportion will be one in 10.

Dr. C. Ward Crampton of New York, an expert in this field, in a new Public Affairs Committee pamphlet titled "Live Long and Like It," says:

"The 60-year-old man of today is often far more vigorous than his father was at the same age. He is enjoying life, and with zest and confidence looking forward to much more of it. Tomorrow promises even greater improvement."

He points out that this improvement depends on people, particularly those from 40 to 60, not leaving everything to luck and nature, and not waiting for sickness or pain to compel them to get medical guidance.

Geriatrics provides a series of complete physical examinations at the beginning of the "course," followed by a full health program to be carried out for six months or a year, and reviewed at the end of each period. Principal elements of the long-term geriatrics program are carefully prescribed exercise and diet.

Today a man of 60 may be as young, vigorous and vital as the average man of 40. On the other hand, he may present the common picture of the man of 80, old, weak and miserable.

Geriatrics, as one "satisfied customer" described it, is the "old family doctor idea gone modern"—Financial Post.

Stolen Machine Was Not Hard To Locate

WINNIPEG.—The peanut vendor's machine was not the most valuable vehicle on the street, but it was the gaudiest.

A jalopy of ancient vintage, it stood on Main street, just a block from the police station. Its glass slides gleamed and its interior bulged with the vendor's wares.

Not an object to be easily stolen—or stolen at all, in the ordinary way—a passerby might have observed. But it was.

Yes, some particularly daring citizen had removed it from under the very arm of the law.

But they got it back. They found it a few blocks away, a man lying fast asleep on the street beside it. His pockets were stuffed with popcorn and in his hand was a half-eaten hot dog. He had been drinking.

In city police court, Daniel Jackson was fined \$50 and costs for taking the vehicle without the owner's consent.

Employees of French wineries are provided with a bottle of wine a day at the winery and a cash every two months for home use.

Woolly Cap, Mitts For Gala Evenings

Mitten and cap combination returns to the formal fashion scene in this knitted outfit of white angora. The little helmet, protection from winter blasts on gala evenings, hugs the head and fastens under chin. Mittens have beaded trim.—S.N.S.

Pink lace veil with eye mask feature this black velvet bonnet for fall and winter wear. It was seen at a London millinery preview.—Reuter photo from S.N.S.

All-Canadian Dessert—Apples

OTTAWA.—If the housewife wants to try a hand at some all-Canadian dessert—she doesn't have to go very far.

The town market should be filled with bushels of the crisp, rosy fruit, which perhaps grows better in Canada, and in more quantity, than in any other country of the world.

The Dominion Department of Agriculture has devoted a booklet exclusively to ways and means of eating apples, in salads, desserts, and even as a relish with the main course of a meal.

To enjoy apples with baked ham the following ingredients are needed: one slice of uncooked ham (about 1½ inches thick); one teaspoon dry mustard; two teaspoons vinegar; two apples; one-half cup brown sugar; one teaspoon butter.

Dice enough celery to equal one-half apple pulp. Mix mustard and vinegar together and spread on ham. Slice apples thinly and spread in layers on ham. Sprinkle with brown sugar and dot with butter. Bake in a moderate oven (350 deg. F.) until ham is tender—about 45 minutes.

Apple Cup Salad

Apple cup salad makes a choice luncheon dish. Core the apples and scoop out pulp to make apple cups. Fill a bowl with cold water and as each apple cup is made, put the cup in the water.

Dice enough celery to equal one-half apple pulp. Mix celery and apple pulp with one cup cottage or cream cheese. Blend with salad dressing.

Dry apple cups and fill with mixture. Serve on crisp beds of lettuce.

Upside Down Cake

And for a dessert you can never go far wrong with an apple upside-down cake.

Ingredients: one-quarter cup butter; three-quarters cup brown sugar; three apples, sliced. Its glass slides gleamed and its interior bulged with the vendor's wares.

Not an object to be easily stolen—or stolen at all, in the ordinary way—a passerby might have observed. But it was.

Yes, some particularly daring citizen had removed it from under the very arm of the law.

But they got it back. They found it a few blocks away, a man lying fast asleep on the street beside it. His pockets were stuffed with popcorn and in his hand was a half-eaten hot dog. He had been drinking.

In city police court, Daniel Jackson was fined \$50 and costs for taking the vehicle without the owner's consent.

MAN, WIFE KILLED IN TRUCK-TRAIN CRASH—Alone in their truck when it was hit by a freight train at Campbell's Corners on the Easterbrook Rd., near Aldershot, Ont., Clifford lies was critically injured and Mrs. lies still killed. The light panel truck, seen at scene of accident, was carried 50 feet down track. Mr. lies died a day later. A daughter, Mrs. L. Dafeo, Aldershot, survives.—S.N.S. photo.

OUR COMPLETE SHORT STORY—

"GOODNIGHT SWEETHEART"Reminiscing Scenes
Of An Almost For-
gotten Past

By JOHNNY ROWLEY

CHARLEY FERRIS had always said "Goodnight sweetheart" to his wife the last thing before going to bed when they were first married. He had continued the practice when he was thirty... and when he was forty, and now that he was seventy-three he saw no reason for giving it up.

"Goodnight sweetheart," he murmured, standing in the dusk of the upstairs room in his daughter's home.

He didn't get into bed immediately but went and stood by the window overlooking the garden. It was hot with the heat of late summer after a scorching day and was only now, at ten o'clock, beginning to cool off. He stood there, absently, drinking in the warm glow of the moon, scarcely thinking when he caught the murmur of voices from the clump of evergreens around the small summer house.

He didn't mean to eavesdrop but the voices wafted up to him on the cool evening breeze were clear and distinct. He knew at once who was there and frowned.

His granddaughter Dorothy... Dot, as she was to the family... was almost the image of his wife when they were first married. For that reason he had always thought more of her than his other grandchildren. Only today he had heard that she and Dick Albright were on the verge of breaking up. The news had bothered him for he thought a lot of them both and had been looking forward to the day when they would be married. He had continued to worry about it all day.

His hesitant offer of help had been met with refusal. "It's nothing you can go on anything about, Gramps," Dot had told him. "I'll just have to work out of my own accord."

He had had to be content with that but it had continued to worry him. The voices were lower now and he could only catch a word now and then.

He heard Dick say earnestly: "But Dot, if we're to make this thing work out we've got to trust each other." Dot's reply was lost in the night air but the old man had scarcely listened for it.

His mind had gone back almost fifty years. "Did you hear that, Nancy?" he asked. "He says they've got to trust each other." He chuckled. "Remember that time I had to go to Chicago and was a day late in getting back? That was bad enough... but when you found the gloves

in my valise, the ones I'd forgotten to give you, you thought I was lost for sure. It was a long time before you would trust me completely." He sobered suddenly, coming back to the present. "They're going through the same thing, Nancy," he said.

They were talking again, earnestly, and had got up and stood now just in front of the summer house where the warm glow of the moon glistened softly on the girl's hair.

She was slim and tall and her hair, tumbling in soft curls was a raven black. "You know I love you," he heard her say. "I guess I always will..."

He didn't hear any more for his eyes had filled and he was thinking of another garden in the moonlight and of another girl. "She's the spitting image of you when you were twenty, Nancy," he said. "Do you remember the night I asked you to marry me...?" He was lost for a few moments in contemplation. "It was a night like this," he continued finally. He meditated on the scene, his eyes half closed. "It's almost as though it were yesterday," he murmured.

As he watched the boy stepped forward and attempted to take her in his arms. For a moment she protested, but only for a moment, and with a muttered exclamation pressed her face to his. "The trouble is all patched up," he turned from the window, leaving Dot standing quietly in the moonlight and went to his narrow bed. He paused for an instant before he got in... long enough to switch on the light and look at the picture of a dark-haired laughing girl in a high-collared, long-sleeved dress which stood on his bureau. "Goodnight, sweetheart," he whispered and then turned off the light and sank back against the pillow with a contented sigh.

"Goodnight, sweetheart," he murmured once again before his eyes fell shut.

Fashions

By ANNE ADAMS

For A "Good" Doll

To thrill a little girl and her doll who were good all year! Make this doll outfit for Christmas! Jumpers, jacket, blouse, coat, robe, pajamas, lingerie—Pattern 4531.

Pattern 4531 is available for dolls 12, 14, 16, 18, 20, 22 inches. For individual yardages, see pattern. This Anne Adams pattern is pre-tested, easy to use, simple to sew, it includes complete directions. Send twenty-five cents (25c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

LILAC BLOOMING SECOND TIME

BRANDON, Man.—Vernie H. Kolly of Alexander, stumped horticultural experts here. He informed them he had a lilac bush in his garden which was blooming for the second time this year. The experts said they had never heard of such a thing before.

LOOT WAS SMALL

EDMONTON.—Thieves who broke into two Edmonton service stations in a single night stuffed their pockets full of loot, but got little financial return. Their bag was \$4.50—all in pennies.

CREATE SUPERMEN?

JOHANNESBURG, South Africa.—H. C. Barnard, 27-year-old radio engineer, of Germiston, thinks human beings can be transformed into supermen. He has developed an apparatus intended to stimulate the brain with electric rays. 2799

B.C. Needs More Prospectors

VANCOUVER.—British Columbia needs prospectors. The minerals are here—they need only to be uncovered, declares Frank C. Woodman, manager of the B.C. and Yukon Chamber of Mines, in announcing the Chamber's annual night school prospecting course.

Mr. Woodman predicts a tremendous boom in mining activity in coming years. Many who have taken the mining course in its past 30 years have made important discoveries, he says.

Subjects studied include mineralogy, geology, prospecting, staking claims, and methods of analysis, testing and development to make a prospect saleable to mining companies.

VALUE OF FRUIT CROP HIGHER AT PENTICTON

PENTICTON, B.C.—On the basis of grades, value of this year's fruit crop in the Penticton district is on a par with other years.

The crop is less than estimated in the original survey, due to small size of fruits. However, grade for grade, the overall price is better than last year.

The American market is especially good this year for selected grades.

Pasteurized Milk Is Safe.

"Hounded" by HEADACHES

Blinding pain, constant throbbing can make life a misery.

Many headaches may be caused by the failure of the kidneys to perform their normal duty of filtering poisons wastes and excess acids from the blood. Kidneys fail and poisons remain in the system, headaches, backache, rheumatic pains, disturbed rest may often follow. Dodd's Kidney Pills help your kidneys clear out trouble making poisons and excess acids so that you feel better—rest better—work better. Get Dodd's today. 148

PEGGY

I FEEL KINDA SAD ABOUT SUMMER COMING AND SCHOOL CLOSING.

FOR GOODNESS SAKE, WHY?

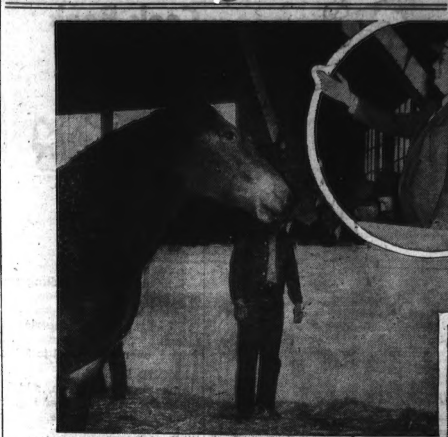

I'VE ENJOYED HAVING YOU STOP AND TALK WHILE I'M ON DUTY.

I'LL MISS THAT.

I ONLY LIVE TWO BLOCKS AWAY—YOU CAN DOCK OVER ANY TIME.

BUT IT WON'T BE THE SAME.

I'LL JUST BE ANOTHER CIVILIAN THEN.

Horses Sell Highest In Years

Auctioneer Laurie Drackett shown calling for bids at the horse sale in Moose Jaw, Sask., which each year precedes the feeder show and sale of feeder steers at the Southern Saskatchewan Co-operative stockyards.

Redwater Well Big Producer

EDMONTON.—Imperial Oil Redwater No. 1, discovery well 30 miles northeast of Edmonton and 56 miles northeast of Leduc, has demonstrated an open flow potential of over 1,700 bbls. a day, may prove even larger when further acidization is complete.

Initial testing before acidization of the 3,264-ft. well with its 140 ft. of oil-bearing Devonian formation returned only 262 bbls. of oil in a 12-hour period. After acid treatment with 500 gallons of acid, however, the well returned an average of 72 bbls. of oil an hour on a six-hour open flow test. This represented a daily oil production rate of 1,728 bbls. Further treatment by acidization is being carried on with good hopes that open flow potential may prove still higher.

Little gas has accompanied the oil production. Significance of this is now being studied by officials. Apparently there is considerable pressure present for the well to produce the way it has. This could come from either a gas or water drive. A second test well is to be completed five miles north of Redwater No. 1. The oil runs about 25 deg. API.

CHICK HATCHING BUSINESS DECLINES

CALGARY.—A sharp decline took place in the chick hatchery business in Western Canada this year, delegates said in reports presented at the 11th annual meeting of the western section, Canadian Federation of Hatchery Associations.

Speakers blamed the late, wet spring and "greatly increased" feed costs for the decline. Sharpest drop was reported by British Columbia. W. V. Hufford of Milner, said hatcheries in the West Coast province had only 60 per cent. of a normal year's business.

RECIPES**CHOCOLATE FLUFF**

Add ½ cup confectioner's sugar to 2 stiffly beaten egg whites. Beat until they stand in peaks. Slowly add one 1-ounce square unsweetened chocolate, melted, ½ teaspoon vanilla and ½ teaspoon salt, and chill well.

BREAD PUDDING

2 cups dry bread crumbs
4 cups scalded milk
1 tablespoon butter
½ teaspoon salt
¾ cup sugar
slightly beaten eggs
1 teaspoon vanilla

Soak bread in milk for 5 minutes. Add butter, salt and sugar. Pour slowly over eggs; add vanilla and mix well.

Four into greased, baking dish. Bake in pan of hot water in moderate oven (350 deg. F.) until firm, about 50 minutes.

Serve warm with any plain sauce, or plain cream. ¼ cup raisins may be added if desired. Note: You may use ½ cup sugar and ½ cup syrup.

Western Briefs

WINNIPEG.—Beer parlors in Winnipeg won't be permitted to use cigarette-vending machines. Civic health committee refused to change the licensing by-law to permit the operation of the machines in local pubs or anywhere else in the city.

BEAUSEJOUR, Man.—Beausejour's Memorial rink and arena is on its way to completion. Speeding construction of this fine project is a committee who have sent forth an appeal for voluntary workers and who are promoting organizations to stage entertainments in the rink in order to raise funds and speed its completion.

SANDY LAKE, Man.—Believed to be the largest squash ever grown in this district, J. Michanuk, who farms three miles east of Sandy Lake, is proudly exhibiting a monster that weighs 65 pounds. It is 38 inches in circumference and 67 inches in longitudinal circumference. Mr. Michanuk says the squash received no special treatment, but just seemed to grow at an amazing rate during August and September.

CALGARY.—The historic "44" ranch in the Clearbrook-Nanton district of southern Alberta has been sold to an Argentine cattleman, officials of P. Burns Ranches Limited, announced. About 25,000 acres of well land were purchased by Dr. J. M. Cullen of Buenos Aires. No livestock was included in the deal. The sale is believed to be one of the largest ranch land transactions made in Alberta in recent years.

SASKATOON.—Saskatchewan's college of physicians and surgeons went on record as favoring state-aided, contributory health insurance on "reasonable fee-for-service-rendered basis."

INVERMERE, B.C.—William Dickson, Fernie, was re-elected president of East Kootenay Farmers Institutes and A. B. Smith of Cranbrook was returned as secretary at the annual meeting held here.

KELOWNA, B.C.—Mayor W. B. Hughes-Games said he would recommend to the 1949 city council that traffic lights be installed on Kelowna's main street, in view of the heavy traffic.

Some good saddle horses were sold at the Moose Jaw auction. Cowboys with ten-gallon hats and high-heeled boots were much in evidence, and above, horses were in good shape and brought high prices at the Moose Jaw horse sale. Here a few of them wait their turn in the sales ring.

The battle of Chateaugay took place in October, 1812, during the War of 1812. The United States troops were defeated.

Relieve Misery of Stuffy HEAD AND CHEST COLDS

Before bed, massage Thermogene Medicated Rub into throat, chest and back. Immediately pleasant, soothing medicinal vapour helps clear congestion of the upper bronchial tubes... soothes irritation. Thermogene Rub penetrates the skin to ease sore chest and aching muscles. Acts while you sleep! Inhale Thermogene steam-vapour for fast relief. Economical—buy today!

How To Get Quick Relief From Sore, Painful Piles

I can help most pile sufferers. I believe I can help you too if you want relief from the itching soreness and burning pain of piles. My Hem-Rol treatment is different. Hem-Rol is an internal medicine—a small tablet taken with a glass of water. It corrects the conditions INSIDE your body that cause you such intense pile soreness and pain. But I'll be honest with you. Hem-Rol seems to help some pile sufferers more than others so I want to protect those who are not satisfied. I refuse to ask people to pay for something that does not help them as much as they expect it to. If Hem-Rol helps you, surely it is worth the small cost. Otherwise I want you to have your money back. I'll take your word, and people are honest about such things.

All I ask is you use Hem-Rol as directed for 10 days. Then if you are not satisfied return what you did not use and get your money back. This is an unusual offer but Hem-Rol is an unusual medicine. It has been used on a refund basis for over 40 years. I am not afraid to make many refunds as it might help most folks who use it. At all true stores.

R. D. PURDY
Manager Alberta Wheat Pool

WHEAT POOL'S 25TH ANNIVERSARY

Twenty-five years ago on October 29, 1923, the Alberta Wheat Pool started in business. On that date an office was opened in the Lougheed Building in Calgary with a staff of about 15 people. From that small beginning this farmer-owned co-operative grain handling organization has developed into the largest Alberta business. Its assets include 487 country elevators, a 5,150,000 bushel terminal at Vancouver and a 2,000,000 bushel terminal at Port Arthur. It has handled as much as 52,000,000 bushels of grain in a single year, and has had a yearly cash turnover in excess of \$60,000,000. It has branch offices in Edmonton, Vancouver and Winnipeg, and the average number of employees is around 770.

The formation of the Alberta Wheat Pool in 1923 grew out of the experience of Western Canadian farmers with the federal government's participation in wheat marketing during and immediately after World War I. The Canadian Wheat Board was dropped on August 16, 1920, and shortly afterwards a price decline set in which continued until December, 1923, when it reached a low point of 83 1/4¢ a bushel.

The farmers tried to get the government to re-establish a wheat board. Failing in that effort, they turned their energies towards the building up of a voluntary Wheat Pool. Alberta was the first province to complete a Wheat Pool organization. On September 5, 1923, over 26,000 farmers had signed contracts to deliver their wheat to the Alberta Wheat Pool. The following year Wheat Pools were organized in Saskatchewan and Manitoba. The combined physical assets of the three Pools now include some 1,875 country elevators and 8 terminals, with a total capacity over all of 130,000,000 bushels of grain and a total value in excess of \$50,000,000.

One of the principle objectives of the Wheat Pool movement is price security for the farmers. In this regard, in preference to the open market system with its booms and depressions, the men who organized the Pool sought to obtain, over the years, an average price for wheat which would have a reasonable relationship to cost of production.

Another objective was the establishment of a co-operative elevator system operated primarily for service and not for profit. The Alberta Wheat Pool has retained the confidence and support of many thousands of Alberta farmers. In the past quarter of a century it has handled a total of over a billion bushels of grain with a gross value in excess of \$925,000,000. It has paid patronage dividends in cash totalling \$3,724,000 and in reserves of over \$3,000,000. Furthermore, it has redeemed reserve contributions of original members to a total of \$4,468,000.

"It has been our policy to operate this enterprise along the lines of pure co-operation," says R. D. Purdy, manager of the Alberta Wheat Pool. "We believe sincerely in the principle of co-operation and in its effectiveness on behalf of the grain growers. Nothing can take its place in the provision of security and preservation of hard-won rights and privileges."

"We are proud of being Canadians and we want to be nothing else." —Leonard W. Brockington.

"We are not practicing democracy when we accept its privileges and not its responsibilities." —D. Leo Dolan.

VIKING ITEMS

The funeral of the late Miss Mary Eleanor Richardson, who passed away in the Viking municipal hospital after some months illness on Thursday morning, October 21st, was held on Saturday, October 23rd, at 2 p.m. A short service was held in St. Matthew's Anglican church after which the body was taken to the Community hall where a public service was held, the Rev. E. N. P. Orme officiating. Prayers were said and hymns sung after which the pastor told of the unselfish work of the deceased, as an army nurse in World War I, and since arriving in Canada some twenty years ago. The casket was carried by six ex-service men of the first great war who acted as pall bearers, Comrades E. Primett, Ed. Stiles, Roy McDonald, Dave Scott, Wm. Revill, and H. G. Thunell. Also in attendance at the service were a large number of veterans, the late Miss Richardson being an honorary member of the Viking Legion branch.

As the funeral party emerged from the hall an aeroplane droned overhead as a fitting gesture to a lady who had served her country faithfully and well in time of need. The funeral procession proceeded to the Viking cemetery where a short burial service was held by Rev. Orme, after which Legion branch Zone Commander Comrade Hafso read the Canadian Legion burial ritual. The veterans dropped poppies on the casket of their departed member and those wearing berets gave the final salute. Cde. Bob Thunell sounded the Last Post as the Legion members stood at attention.

Friends gathered at the O. Hafso home last Thursday for a social evening in compliment to Miss Wilene Ryley, R.N., who has been a member of the nursing staff of the hospital for the past year. During her stay here she took an active part in the badminton club and ladies curling club. Hostesses were Miss Jean Iverson, Miss Eileen Hagen and Miss Sofie Loveseth who served a delicious lunch. Wilene was presented with two lovely gifts as a remembrance from the twenty five guests present. Miss Ryley left Saturday for her home at Forestburg and after a short holiday will go East to continue her profession as nurse.

Gordon Hafso of Viking, Alberta Canada, was selected as a member of the St. Olaf Chapel Choir at St. Olaf College, Northfield, Minn. The membership which is determined by tryouts conducted the first two weeks of school, was announced this week by director, Paul H. Ensrud.

The tryouts are open to every student at St. Olaf, not necessarily music majors. This is in conformance with a policy of the school that everyone who wishes to participate in a musical organization be allowed to try. Of the 1700 students enrolled this year at St. Olaf almost 700 hundred tried out for one of the six musical organizations on the campus.

Word has been received that Mrs. W. E. Henton passed away at her home in St. Paul, Minnesota, on October 5th. Mr. and Mrs. Henton have made their home in St. Paul for the past eight years and were proprietors of the Viking hotel at the time it was destroyed by fire. Another social evening was held in the North hall last Friday evening under auspices of the local branch of the Canadian Legion. The Wainwright orchestra furnished music for the occasion which is reported as a very pleasant evening by all in attendance.

Mrs. H. Rollans has been visiting with relatives and friends in Edmonton and Tofield the past few days. Her husband returned from a trip to the coast last Thursday evening and found Vancouver a very busy place but lots of fog at night.

Members of the Heffner school of dancing have been engaged to furnish entertainment the two nights of the Viking Elks carnival, November 9th and 10th.

The two federal by-elections, one in Ontario and the other in Saskatchewan held on Monday, were both won by the Liberal candidates.

Hallowe'en is with us again and citizens used to shudder at the thought of the destruction and vandalism practiced on this night of nights that falls on October 31st. As October 31st, this year falls on Sunday it is likely that any celebrations will be held Saturday. For the past two or three years our community has been singularly free from the usual depredations and wanton display of uncouth and unnecessary removal of gates, out-

houses and other movable articles from business places and residences. We trust the nefarious practices of yester years will not return to our fair village, and that any celebrations will be limited to giving apples, candies, etc. to young callers in their masks and carrying small sacks, or some organization arranging suitable parties for the enjoyment of the younger generation.

A writer in the Edmonton Bulletin started a controversy about there being no such thing as Indian Summer and pool-pooled the idea. The venerable editor of the Verreville Observer came to the rescue of those who have held a belief in Indian summer ever since they can remember and quote copious facts in support of the long reversed and welcome days late in the fall or after a cold snap has put a touch of winter in the air. "But ten days ago this district did have a couple of days of chilly winds and some whirling snow flakes in the air, the weather turned mild and has been that way now for several days. If this is what you call Indian Summer, let's have lots of it. Please Mr. Weatherman, give us lots of the red man's happy fall days, and let the Bulletin man's melancholy musings go hang."

The three presidential candidates in the U.S., president Harry Truman, governor Dewey, of New York, and Henry Wallace, former vice-president, are winding up their election campaigns this week previous to the election November 2nd. Mr. Wallace is not conceded much of a chance to occupy the White House for the next four years but is expected to cut in on Truman's vote to a considerable extent, according to pre-election dolesters. It is not the practice of Canadian newspapers to give any opinion or take sides in the presidential elections of our friendly neighboring country. Even if we did it would hardly make any difference to the electors of that large nation, but it might be resented by some. However there is no harm in stating that president Truman has had a big job which was left him by the death of the late Franklin Delano Roosevelt. The problem of post war seem to have been as big or as important as those during the war, that is to win the peace. Truman hasn't the magnetic personality or the radio appeal of the late lamented Roosevelt, but he has plugged away and during the past year has gained in popularity by his straightforward appeal to the electors. Framed by an "unfriendly" Republican congress and senate he has fought on with stubbornness of a Missouri mule. Incidentally he comes from Missouri. There is no rain saying that the result of the election will affect Canada in some way or other. It always has. Just what kind of a president Mr. Dewey would make is the \$84 question—if he wins.

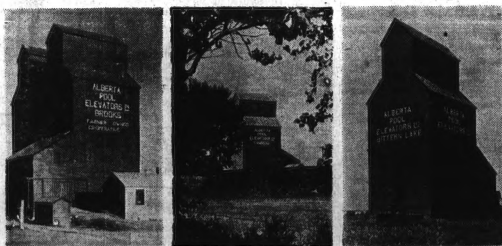

The villagers are retreating accustomed to the wail of the new fire siren that walls forth from the top of the town hall every day at twelve noon. It is a needed addition to the village fire warning service and fire fighting equipment. A switch is being installed at the hospital for emergency purposes. No villager can have too much fire fighting equipment and each new addition is a step in the right direction.

Lindsay Thunell is home from Edmonton where he underwent an operation for appendicitis last week.

NEW LEADER

Henry G. Birks, F.C.I.S., Montreal, who was elected president of the Canadian Chamber of Commerce, the national federation of Boards of Trade and Chambers of Commerce, at the organization's recent annual meeting in Vancouver. Mr. Birks is a past president of the Montreal Board of Trade and is active in many civic efforts in his community.

ALBERTA WHEAT POOL'S Silver Anniversary

"THREE OF 487 POOL COUNTRY ELEVATORS"

The Alberta Wheat Pool started in business on October 29, 1923. Its first office was staffed with only 15 employees, and furnished with second-hand equipment.

Today the Alberta Wheat Pool is the largest Alberta business. Its assets include 487 country elevators and two terminals with a total grain capacity of 37,000,000 bushels.

The Alberta Wheat Pool has paid patronage dividends, over the years, to a total of \$3,724,180.15 in cash and has redeemed reserves from original Pool members to a total of \$4,468,883.85.

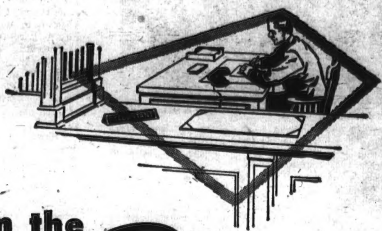

Alberta Pool Elevators has provided excellent service to patrons and has gained a high reputation for fair dealing. The system has handled as much as 52,000,000 bushels of grain in a single year.

All these, and many other accomplishments, have been achieved by the Wheat Pool members, who have rendered such loyal and devoted service to their own organization over a quarter of a century.

Nothing can take the place of this farmer-owned co-operative in providing security and the preservation of hard-won rights and privileges for the grain producers of this province.

"Make this year a Pool elevator year."

Alberta Pool Elevators

From the Bottom ...not the top

HE started as a junior. He moved around. He moved up. He learned a lot about banking, about Canada, about people. He is still climbing, still learning a job which is not mastered in a day... or a year.

He has learned, for instance, that in making loans, a bank manager must satisfy himself that the borrower would merit your confidence if you were lending your own money.

At the same time he welcomes opportunities to put money to work. Loans are part of his business, and an important source of revenue. They help people get along, help build a prosperous, progressive nation.

Contrast his freedom of judgment with conditions in lands where freedom is denied—where every bank is a political tool, every banker a State official! State monopoly of banking, proposed by Socialists here, would open your banking transactions to political intrusion.

CHICKENS SHOW WAY TO CURE ANEMIA

The Journal of Laboratory and Clinical Medicine recently reported some startling results in their regg-producing chickens to react search to discover what caused as they did during wartime food shortage. Their report discloses that the well-housed chickens, deprived of animal proteins, began to droop and look sickly. Other chickens, living in ill-kept and littered henhouses did well, even on a diet poor in proteins. When the henhouse litter was cleaned up they began to droop also.

Research showed that after isolating one micro-organism after another, making cultures of each and testing them, they claim to have found a chicken dung culture which produced the same effects as liver extract in patients with pernicious anemia.

Six Lederle Laboratories researchers, are said to have discovered this value in chicken house litter. TIME (Aug. 30, 1948, p. 40) says that samples of this culture were tried out on patients at Western Reserve University's hospital in Cleveland, Ohio. Two aged women, extremely ill with pernicious anemia, responded as well as patients respond to liver extract.

TIME'S comment is that this is an important discovery. The price increases on the cattle market bring liver extract to such a high that it is expensive to use. If laboratories can produce an anemia treatment from commonly occurring bacteria, the new product will be mass produced within the reach of everyone.

"The international situation has produced an attitude in Canada towards defence different from anything we have ever had in peacetime."—Hon. Brooke Claxton.

"They say you can't eat gold but if you have gold you can always eat."—Austin C. Taylor.

OVEREATING CLUE TO BAD TEETH

Dr. John H. Green of Philadelphia, speaking in the 89th annual meeting of the American Dental Association in the Stevens Hotel, Chicago recently said: "Overeating is as bad for your teeth as it is for your figure. Overeaters usually have more tooth trouble than under eaters," said Dr. Greene.

"The most pernicious offender is the perpetual muncher—the one with a roll of hard candies in the handbag or a dish of chocolates on the table."

He told several hundred of the 10,000 dentists from all over the nation that the person who eats two meals a day is a better dental risk than the one who eats three or six or eight. The figures were his, and he said further that there should be no dessert, "unless they are fruit of something raw."

SAFETY FIRST Here's a safety tip when putting furnace or stove pipes in position. After fitting the lengths securely together, take a piece of white chalk and make a circle around the place where the slightly expanded ends of each length fit over the previous section. If the lengths of pipe start pulling away from each other, the chalk mark will show this movement.

If this small safety tip is adopted, a casual glance at the pipes at any time will show whether the sections are parting company, or whether all is "safe and sure."

There is danger in poorly fitting stove or furnace pipes. Escaping coal gas is probable; a disastrous fire may even be in the making.

BACK AGAIN

Bob Hope, the irrepressible Cockney who grew up in America, is back again to CBC networks—this year on CBC Trans-Canada on Tuesdays (CBX 7:00 p.m.)

Cash Auction Sale

Of the Estate of the late Wm. Armitage

TUESDAY, NOVEMBER 2nd Starting at 11 a.m. 3 miles south and 2 miles east of Sedgewick.

Some of the machinery in this large sale:

1947 John Deere Tractor on rubber, lights and starter, Model D; 1947 1 ton Fargo Truck; 1948 John Deere 14 ft. Cultivator; 1947 Mower; 1946 Hay Loader; Massey-Harris Milking Machine, used only one season; 28-46 Red River Special Threshing Machine, on rubber; 15 ft. Case Swather; 4 Pump Engines, some new; 4 wheel Trailer and 16 ft. Hay Rack on rubber; 8 ft. John Deere Binder on rubber; Bull Rake with Power Lift; 20 Granaries; farm tools of all kinds.

The above are just a few articles listed in one of the largest farm sales of the season. Plan to attend. J. L. MUIRHEAD, Auctioneer Sedgewick, Alberta.

PROBE INTO U.K. WHEAT AGREEMENT LOSS IS PROPOSED

Line Elevators Seek Full Value For Farmers

Proposal for appointment of a Royal Commission to determine the losses suffered by Western farmers as a result of the Canada-U.K. Wheat Agreement, and the sale of wheat for domestic consumption below world values during the period of the Agreement, was made in a communication forwarded to the Acting Prime Minister and Minister of Trade and Commerce today by the North-West Line Elevators Association.

It is proposed that the Royal Commission should be granted authority to assess the amount of compensation that should be paid from the National Treasury to compensate farmers for the losses suffered and that this amount be credited to a permanent fund to guarantee a floor price to farmers in future years. The Line Elevator group further suggests that the Royal Commission pass on the wisdom of the Government, in the future, entering into any long term bulk sales of wheat or other grains.

DISCUSS THE PROPOSED DEGRADING OF RED BOBS

At a recent meeting of the Board of Directors of the Alberta Federation of Agriculture arrangements were made to hold two general meetings for the purpose of discussing the proposed degrading of Red Bobs Wheat.

The first meeting will be held in Edmonton on November 1st, commencing at 10:00 a.m. at the I.O.O.F. Hall, 103rd Street, just North of Jasper Avenue. The second meeting will be held in Calgary on November 2nd, commencing at 10 a.m. at the Labour Temple, 229-11th Ave. East.

Members of the Board of Grain Commissioners have accepted our invitation to discuss the Red Bobs issue in full at these meetings and the Federation wishes to extend invitations to all interested farmers and others concerned in the growing and handling of wheat to attend.

Many farmers have expressed concern over the proposed degrading of this wheat as it is a very The Federation takes the stand popular variety in many districts. That a full discussion of this issue will undoubtedly clear up many points on which there may be misunderstanding and pave the way for action that will be in the best interests of Alberta's wheat industry.

CHEAP REGISTERED SEED

Representatives of seed-grower organizations of the three prairie provinces recently met to consider the supply and demand situation of Registered seed and to agree on prices for this coming year. It was evident that considerable surplus of Registered Thatcher is available but no apparent surplus of any other variety. Seed growers, therefore, agreed to reduce their prices for this year to low levels, setting prices for seed which will certainly not remunerate them for their out-of-pocket expenses, and for the skilled careful work they have had to do.

This is a year, then, I suggest, when farmers should take full advantage of the opportunity to buy generous amounts of this high quality Registered seed now being offered at relatively cheap prices, for the chance may not come again. The use of Registered seed is the only method known of improving the quality of our grain crops. Such improvement not only brings to the farmer higher yields and higher grades, but in addition assists in selling more wheat and for higher premiums on world's markets.

All elevators will shortly post up the official price lists. I heartily recommend farmers to seize this opportunity to purchase good seed at extremely cheap prices.

"Our exchange crisis and austerity measures which it made necessary are but a modest prelude of the grave inconveniences which we will have to face within a few years unless we are realistic about the difficulties which are coming."—C. B. Beaudet.

in CHEMICAL WEED CONTROL

NEW Agricultural methods, originating in busy laboratories, spread rapidly to the farmer.

This crop year alone, chemical weed control methods have brought millions of EXTRA dollars to Western farmers. We are proud that National Grain has played an important part in the introduction of these methods.

From 1942 on, despite severe wartime restrictions, widespread demonstrations over the three prairie provinces, made by our Company, were the first to prove beyond doubt the success of selective chemical weed control. The low volume nozzle for applying 2,4-D was also a National "first." Demonstrations carried out with the valuable assistance of the Universities of Saskatchewan, Minnesota, and California, proved this method to be fully effective. Now used extensively throughout the United States and Canada, low volume application has saved farmers' money in equipment and untold hours of labor.

British Agriculture

IN BRITAIN'S STRUGGLE FOR economic recovery emphasis has been placed on the urgent need for increasing the production of food and manufactured goods, with the object of exporting as much as possible, and decreasing imports. In a report presented a short time ago to the British House of Commons by the Minister of Agriculture, Mr. Williams, some interesting facts were made public regarding recent advances in food production in that country. It was estimated that nearly 500,000 more acres of land were devoted to food production this year than in 1947, and that next year it is hoped that 1,250,000 acres will be under cultivation. Of this acreage, it is expected that 2,340,000 will be used for wheat, 1,000,000 for potatoes, 392,000 for sugar beets and 200,000 for linseed.

Standards For Poultry Raised

It is also hoped that during the next year live-stock production will be considerably increased. Poultry production, the report showed, had expanded rapidly, with an increase of 95 per cent, or more than 10,000,000 hens more in the previous year. Official poultry returns indicate this summer, showed that there were at that time over 44,378,000 hens which were expected to increase egg production by 670,000,000 during the present year. The British Ministry of Agriculture has recently introduced new methods of increasing egg production by improving breeds and assisting farmers in various ways to maintain high standards of health among their flocks and to obtain maximum egg production throughout the year.

Help To Bring About Recovery

Milk production has also been increased. It is hoped that 900,000 more calves will be produced next year, and that there will be improvement in the quality of dairy herds. By improving breeds it is estimated that there would be a yearly increase of from 50 to 100 gallons of milk from each cow, and also an increase in the amount of butter fat contained in the milk. All these facts indicate the part which agriculture is playing in Britain's effort to bring about economic recovery. Sir Stafford Cripps, Chancellor of the Exchequer, who visited Canada recently, expressed optimism over the progress which is being made in this effort, and said that the British people have reason to be very hopeful of its success. It is apparent that the British farmers are doing their part in increasing the output of food and other agricultural products to meet the needs of the country during this critical period.

Blackberries Blamed For Polio Contact

VICTORIA—Blackberries growing on a vacant lot and eaten by the sufferers, may be the contact for two Oak Bay Elementary School pupils suffering from poliomyelitis, municipal council has been informed. The lot was burned off immediately and the whole area sprayed with DDT.

In Vancouver, Dr. Stewart Murray, city medical health officer, said such a contact was a possibility, but only a remote one.

The disease might be transmitted by flies he said, but is much more likely to be transmitted direct from a polio carrier.

SHARE RIVER HYDRO PLANT SUPPLYING YELLOWKNIFE

EDMONTON—Power now is surging over 90-mile transmission lines of the Snare River hydro plant to Yellowknife supplying 8,000 additional horsepower to Giant Yellowknife and the northern mining town.

The unit which has taken about two years to construct, is the first of several generating plants the government plans to install, eventually for a total output of 25,000 h.p. The power from the new plants will serve the gold mines in Yellowknife and also residents of the town.

DOES INDIGESTION WALLOP YOU BELOW THE BELT?

Help Your Digestion—28¢ For The Kind Of Relief That Helps Make Your Run To Go. More than half of your digestion is done below the belt—in your 25 feet of bowels. So when indigestion strikes, try something that helps digestion in the stomach AND below the belt.

What you may need is Carter's Little Liver Pills to give needed help to that "forgotten 25 feet" of bowels.

Take one Carter's Little Liver Pill before and one after meals. Take them according to directions. They help wake up a larger flow of the 3 main digestive juices in your stomach. A 12 bowels—help you digest what you have eaten in Nature's own way.

Then most folks get a kind of relief that makes you feel better from your head to your toes. Just be sure you get the genuine Carter's Little Liver Pills from your druggist—35¢.

FUNNY And OTHERWISE

Wife: "Women are not very strong physically."
Hubby: "Perhaps not; but they can put the cap on a fruit jar so that it takes a man 20 minutes to take it off."

The village milkman bought a horse for the morning round. It was not exactly a thoroughbred, but it had four legs. One day he took his bargain to the blacksmith to have him shod. The smith regarded the weary-looking animal critically, paying particular attention to his lean body and spindly legs. "You ought to have a horse there some day," he said at length. "I see you've got the scaffolding up."

"There was a crowd at the town hall last night," said the oldest inhabitant to his wife. "Something special on?" asked his better half. "Oh, yes! It was burned down," was the reply.

A visitor to the Capitol was accompanied by his small son. The little boy watched from the gallery when the House came to order. "Why did the minister pray for all those men, Pop?" "He didn't. He looked them over and prayed for the country."

Printer's error: "Judge Bentley, one of our most eligible bachelors, is retiring from politics. Hale, hearty and 55, the judge says he wants a little peach and quiet."

We like the story about the Scotswoman who was a man of few words. He quarreled with his wife one morning, left the house and did not return for 12 years. When he came back, he walked in quite calmly as though nothing unusual had happened. "And where might you have been, Sandy Macpherson?" asked his wife. "Out" came the reply.

Wife to husband: "You'd better get up and go see why the baby's not crying."

He was one of those fathers who believed in trying to answer any questions put by his son. So he did his best when the youngster asked: "What are ancestors, daddy?" "Well, my boy," he replied, "I'm one of your ancestors, and your grandfather is another."

A puzzled frown marred the childish brow. "Then, daddy, why do people brag about them?" 2799

Bird Changed Sex, Reaches Ripe Age

VANCOUVER—Goo-Goo, a bi-sexual mallard that wanted to see how the other half lived, now is rated a centenarian. At the ripe old age of 12, the pet of Mr. and Mrs. William Lamontaine is the equivalent of a human well past the century mark.

About 10 years ago Goo-Goo eschewed the mundane female life of egg-laying, at which she was no amateur, and began to change to a quacking, gaily-plumaged drake. Mrs. Lamontaine's suspicions of the chameleon process were confirmed by a game warden.

The bird had achieved a complete change of sex. Now slightly lean and too heavy to fly, Goo-Goo lives a quiet retired life, but still looks and acts like any well-dressed drake.

VOLUNTEERS BUILDING NEW RINK AT THE PAS

THE PAS, Man.—The new community rink being constructed here is expected to be completed and ready for use this winter. The main arches have been erected and working bees of volunteers are putting on the outside sheeting under flood lights. The various women's organizations of the community are serving hot lunches to the volunteer workers.

Fuel Briquettes Made From Straw And Sawdust

WINNIPEG.—Fuel briquettes can now be made out of straw and sawdust without the use of a "binder". R. A. Sara, managing secretary of the industrial development board, told a meeting of the Manitoba Electrical association here.

Exhibiting samples of the straw and sawdust briquettes, he said they had the same heat value per pound as lignite coal. "A machine has been patented," he told the meeting, "that compresses loose straw and sawdust into briquettes with the aid of heat, and the portable machine will be capable of processing 5.4 to 22.4 tons of straw every eight hours, depending on the size of briquettes."

Speaking on new edible and inedible uses of farm products, Mr. Sara told of the growing importance of the oil seed processing industry in Canada.

Canada has 13 oil extraction plants, of which three are in Manitoba, Mr. Sara said, and predicted the rapid expansion of these plants to a position where Canada's annual import of 170,000,000 pounds of vegetable oils will be greatly reduced.

Some butterflies, like flowers, have fragrance. These smell of sweet grass, jasmine, syringa, mimosa, orange blossoms of balsam.

Western Judges Selected For Royal Winter Fair

The following is a list of departments named of Western judges selected to act at the Royal Winter Fair, Toronto.

Breeding Horses—Belgians and Percherons, Grades and Wagon Horses—George T. Fraser, Tate, Sask. Clydesdales, Grades and Wagon Horses—Walter Ross, Oids, Alta. Filominos—T. P. Devlin, Winnipeg, Man.

Market Cattle—Live Animals—J. Charles Yule, Calgary, Alta. Breeding Swine—Yorkshires—Alex. McPhail, Brandon, Man.

Market Swine—Swine Carcasses and Wiltshire Sides—Lester Hancock, Winnipeg, Man.

Seeds—Small Seeds—Dr. W. J. White, Saskatoon, Sask. Wheat, Oats, Barley, Flax, Peas and Sheaves—L. Bell, Saskatoon, Sask., C. A. Weir, Calgary, Alta. Potatoes—H. S. MacLeod, Vancouver, B.C.

Canadian Council On Boys' And Girls' Club Work—Beef Cattle—John Ochner, Winnipeg, Man. Seed Grain—D. M. MacLean, Winnipeg, Man. Food (Girls' Work)—Miss Jean Stewart, Calgary, Alta. Miss Edith Rowles, Saskatoon, Sask.

THIS IS ONE WAY TO CATCH THEM

DETROIT.—Walter Baker, 34, will spend the next 90 days in jail because of carelessness.

He failed to notice when he took \$45 worth of camera equipment from an automobile that two Bell Telephone linemen were on a pole 30 feet above watching every move.

One of them, Ralph Banner, plugged in his hand telephone and notified his company which called police.

Don't be fooled by

Manitoba Man Invents Gadget That Registers Pressure On Tires

WINNIPEG.—Do you ever wonder whether you have a flat tire as you speed along the highway? Well, you needn't do any more guessing says the Winnipeg Free Press. M. N. Borodie, garage owner at Oakburn, Man., claims he has a patent pending for a tire pressure indicator which will show on your dashboard when the pressure is decreasing in your tires.

"It's just an inexpensive little gadget that fits on the wheels," said Mr. Borodie.

"When the pressure of the tire is

Don't Drown The Cement Mixture

Concrete is one of the most versatile materials used around a farm. Properly mixed it will resist the penetration of water and support the loads expected of it, says C. B. Harrison of the Dominion Experimental Station, Swift Current, Sask.

The amount of water used with cement greatly affects the strength of the mixture, its workability, and its resistance to water penetration. But frequently cement is mixed with almost complete disregard to proper proportions. For example, four Imperial gallons of water are recommended per sack of cement for concrete used in most types of farm construction. With this amount of cement and water, 2½ cubic feet of sand and three cubic feet of gravel are suggested. A good rule to remember, is change the proportion of sand or gravel if the mix is not as workable as required, but do not change the proportion of water and cement.

Frequently concrete is made from sand and gravel as it comes from the pit. In nearly every case there is too much sand. Fifty per cent sand but when there is more sand than that, it takes more material to make a cubic yard. It pays to screen some pit-run gravel and add some of this coarse material to the mix. The concrete will be more dense, more durable and more water resistant. It will take fewer pounds of cement to do the job.

Once the mix is ready to pour into the forms, care must be taken to tamp it in properly to avoid the possibility of air pockets in the final structure. Air pockets are formed in two ways. If there is too much water in the mix, the water will tend to gather and form a pocket. When the forms are taken away, the water evaporates and a pocket is left which weakens the concrete. If the mix is too dry and not thoroughly packed, air holes are apt to remain as a source of danger.

Another point to watch in packing the mix into the forms is to make sure that the heavier gravel particles are not near the form. Slide a shovel down between the wet cement and the form to work such particles back to the centre. The idea behind this is that heavy frost can spring the larger pieces of gravel out of the wall, if they are exposed, and leave unsightly holes.

An additional way to tell if the mix is about right is to follow another tried and true rule: If a shovel will stand up by itself in the mix, it is a good mix. But above all, remember that the amount of water to the quantity of cement governs the strength of the concrete. Don't drown the cement mix.

Care Hints For Stockings

Now that the very sheer full-fashioned nylons are becoming available, hosiery manufacturers have lately been stressing the need for gentleness in handling these more fragile weights. While nylon thread itself is strong, nevertheless the extremely sheer stockings must be treated like the wonderfully flattering luxuries they are!

These ultra-sheer nylons are designed for dress-up wear. No smart woman would wear her lacy party frocks to the office, or to do housework in. Neither should she wear her lovely sheer nylons! Nothing is more flattering to the leg than full-fashioned nylons—but they must be treated with the respect that their sheerness deserves. They should be worn only for very special occasions. They must be washed with care in mild suds and dried away from heat. Any roughness of the hands, a ring with sharp points, or a sharp nail may snag them, and mar their beauty. For regular wear, manufacturers say, the more serviceable weights are recommended—have your ultra-sheer full-fashioned hose, with the delicate and slender seam, for your more special moments!

CLERIC MAILS SERMONS TO HIS CONGREGATION

SPRINGFIELD, Ill.—Rev. Phillips Brooks Smith recently mailed his Sunday sermon to his Methodist congregation.

He said not enough people showed up for church to make it worth while preaching the sermon.

at 32 pounds, nothing happens: When it goes down to 29 pounds, a red light starts to blink on the dashboard, and when the pressure goes down to 28 pounds, the red light stays on until the tire is fixed."

Mr. Borodie was just a little cautious when he was asked exactly how it worked. "Someday you'll see it—you'll drive a car with one on it," he answered.

One of the places his invention is most needed is on the dual wheels of buses, said Mr. Borodie.

At present drivers often cannot tell whether they have a flat or not with dual wheels, he explained. Similarly, airplane pilots cannot be sure that the tires on a plane are okay after a take-off.

The Oakburn garage-owner claims that he can easily turn out two of these gadgets a day with his own tools, and that any garageman can install them.

The idea for the invention first came to Mr. Borodie when he heard garage mechanics saying what a grand thing it would be if a driver could know right away when the pressure started to go down in his tires.

After working on the idea for about a year, he developed a separate unit which would give the driver this information when it was attached to the wheel. He put one on his truck and he tried one on his own car.

"To demonstrate this gadget, all I

have to do is fix the valve on one tire so that it will leak slowly. Then the indicator on the dashboard flicks on as soon as the pressure starts to go down a bit," he said.

Ice Formation At Poles May Upset Earth

DOUGLASSON, N.Y.—The end of the world as we know it now can be put off with a \$10,000,000 engineering project, Hugh Auchincloss Brown said at his home here.

The 69-year-old electrical engineer gave warning of a horrendous fate in store for the earth if the ice caps are not melted.

The rapidly increasing weight of the large Antarctic ice cap can tip the globe over at any time "just as you might roll a pumpkin over so that a frosted side could thaw out in the sun," he reported.

Brown did not set an exact date for this undesirable event.

"Everyone wants to know that," he observed.

But he declared that a 35-year study of the earth had convinced him that the globe went through a similar gyrations every 8,000 years to compensate for the unbalancing effect of heavy ice formation at the poles.

The present epoch is up and the earth is due to tumble like a runaway top, he believes.

When this happens, he said, most of the major continents will be flooded and the ice-covered north and south poles will exchange climatic conditions with what are now tropical regions.

The New York area may find itself at the bottom of 31 miles of ocean water, along with most of the civilized world.

Being forewarned of the impending danger, Brown said, there is hope we can put off the disaster, which he contends has wiped out past civilizations at regular 8,000 year intervals. He urged the immediate formation of a "global stabilization organization" to survey the vast Antarctic ice cap and figure out how much ice should be blasted off, with atomic bombs, to bring the earth into balance.

The survey would cost about \$10,000,000, he estimated.

ONE VICTORY OVER FIRE TO THEIR CREDIT—Only two weeks old, the Wasaga Beach, Ont., volunteer fire department has already scored a victory. Pat Gray is willing volunteer, ready to aid in emergency. Three daughters of Fire Chief Reg. Furnival, left to right, Marie, Connie and Joanne, display new fire truck with Pat Robson, (right), also interested. Brigade holds daily workouts.—S.N.S. photo.

ROYAL AIR FORCE PILOT TELLS OF PASSING THE SPEED OF SOUND

LONDON.—A fair-haired pilot, Sqdn. Ldn. John Derry, 26, told a press conference how he passed the speed of sound in a screaming dive recently.

Derry was brought to meet reporters after the official announcement was made that he had flown through the "barrier of sound" in a swallow aircraft shaped like an arrow point.

"The main instrument in the cockpit showed mach number one, which is the speed of sound or at the altitude about 675 miles an hour," he said. "I was between 30,000 and 40,000 feet. I was at full power at the end of the dive. I saw the needle go past mach number one."

"Then what did I do? I started to pull out at once. There's not too much sky at that speed."

A United States plane was the first to exceed the speed of sound, but

Coal Mining And Lumbering Most Dangerous Jobs

CHICAGO.—Coal mining and lumbering rank as the most dangerous jobs in America, according to the 1948 edition of "Accident Facts", statistical yearbook of the National Safety Council.

Reports to the council show that disabling injuries per 1,000 man-hours totalled 59.74 for the lumbering industry and 54.46 for coal mining. The average for all reporting industries in 1947 was 13.26.

There were 7.96 days lost per 1,000 man-hours worked in 1947 in coal mining, and 5.24 in lumbering, as compared to 1.23 days for all reporting industries.

The council points out that the communications industry ranked as the safest among reporting industries, with a frequency rate of 2.98 and a severity rate of .16.

TO COMPLETE ROAD IN FOUR OR FIVE YEARS

TRAIL.—Within four or five years, Public Works Minister E. C. Carson told the Southern Trans-Canada Highway Association, B.C. will complete its section of the route.

British experts said it was achieved with rocket-power assistance and a parent plane was needed to carry the United States craft to high altitude for release.

Derry took off, landed and dived in the machine which he has flown many times. As he plunged earthwards in his fastest dive, he could hear through the earphones messages being exchanged with other planes in the air.

DeHavilland experts at the conference said Derry flew a machine similar to that in which Geoffrey de Havilland was killed in a power dive in 1946. They were uncertain what happened when de Havilland died so they tried to make Derry's plane stronger.

"What did it prove?" asked Derry. "It proved the machine I flew could stand up to more than the speed of sound. It proved it because I'm here and the plane is in the hangar."

Commerce Group Publishes Guide Against Depression

WASHINGTON.—The United States Chamber of Commerce has issued a "guide against depression" but it didn't say one is coming.

The 16-page booklet cautions business men to take advance action and watch for "danger signals and storm warnings" to prevent another cycle of boom-bust.

But it says: "There is no easy rule-of-thumb. In a dynamic free economy there are no enduring normal relations of different prices, or of supply and demand."

The pamphlet lists a series of "do's" and "don'ts" which include these admonitions: "Watch for signs of over-expansion."

"Don't ignore... the possible storm warnings in rising interest rates."

"In particular, don't overbid the prices of scarce materials, components, or labor."

Film Star Reduces By Ice Cream

HOLLYWOOD.—Natalie Schafer, one actress who'll admit she has to starve herself to keep gorgeous, came up with the best reducing diet of all. Miss Schafer eats nothing but ice cream.

Vanilla for breakfast, chocolate burnt almond for lunch, and peppermint stick, pineapple pecan, and pistachio for dinner.

It sounds like the kind of diet all fat ladies everywhere dream about while they crunch away on lettuce and celery.

What's more, claims Miss Schafer, it works. "I've been eating nothing but ice cream for seven days," she beamed. "And I've lost seven pounds."

The attractive blonde says she's tried every diet anybody ever thought up to torture stout people. She says she lost weight, all right, but her sunny disposition disappeared faster than those excess pounds.

"I used to get cranky," she confessed. "And I'd dream about ice cream sodas and French pastries. I was hungry all the time."

"Now I eat ice cream three times a day and nothing else. I'm always in a good mood. Who wouldn't be?"

Miss Schafer isn't what you'd call a fat lady. She looks just about the way most gals would like to.

But she had to lose 10 pounds in a hurry. She couldn't get into any of those clothes she spurned on in Paris.

"I certainly ate plenty coming home on the boat," she grinned. "And I haven't had a chance to dazzle anybody with my new outfit."

There's only one catch to this ice-cream reducing diet, she says. You have to like the stuff to begin with. "Otherwise you'd go crazy. But I'd rather eat ice cream than anything. Why, I used to sleep till noon. Now I can hardly wait to wake up and eat my ice cream breakfast."

She'll be 10 pounds slimmer and back to her every-day eating habits. Only she won't get to eat ice cream any more.

When you combine it with other foods—it's fattening.

Pigeons seldom live where there are monkeys, as these nimble thieves persistently rob the pigeons' nests.

Birth Blemishes Removed By Early X-Ray Treatment

NEW YORK.—Three Philadelphia doctors reported that unsightly birth blemishes can be made to disappear if treated early by X-ray.

Their new concept is in contrast with older techniques that recommended treatment in later life.

The experts, Drs. Eugene F. Pendergast, James C. Katterjohn and James B. Butchart, of the University of Pennsylvania Hospital, made their report in the American Journal of Roentgenology and Radium Therapy. They recalled that the birthmarks are known as hemangiomas and that the condition is feared most by mothers because of the cosmetic deformity which it often leaves upon infants and children. The lesions range greatly in size and are usually reddish or purplish in color.

"The condition," they said, "is congenital and the most important thing about the lesion is that whatever treatment is given should be given early; that is, as soon after birth of the infant as possible, or as soon as the blemish appears."

Over the years, they said, many physicians did not recommend treatment, largely because they had been taught that most of the blemishes would disappear spontaneously.

The doctors based their new findings on a study of 506 blemishes on 406 patients.

"We do not believe in watchful waiting," the doctors said. "A hemangioma treated at three weeks of age requires less treatment and responds better than one treated at three months."

They said there is no doubt that some lesions heal spontaneously, but that "it is not possible to predict with assurance which lesions will remain quiescent, grow or disappear spontaneously."

They recommended irradiation for the following reasons:

1. Radiation can be administered without harmful effects.

2. Small doses of radiation will enhance any natural tendency of the lesion to disappear.

3. The results are excellent and are superior to any other method we have observed.

"We have observed our results over a period of 20 years and in no instance have we obtained unsatisfactory results that can be attributed to radiation," they said.

Canadian Scientist Honored For Work

WASHINGTON.—Dr. Dilworth Woolley, 34-year-old blind scientist who was born in Raymond, Alta., was among three chemists honored for scientific achievement by the American Chemical Society.

Dr. Woolley is an associate member of the Rockefeller Institute for medical research in New York.

He received the \$1,000 Eli Lilly & Company award in biological chemistry for his extensive research in that field, particularly on problems relating to vitamins and anti-vitamins.

Woolley, who lost his sight nine years ago, has continued his laboratory work with the aid of two laboratory assistants. They report their observations to him and he uses the data to direct the experiments, planning future procedure and developing his own conclusions.

Style Changes In Accidents

CHICAGO.—Style changes in accidents, as well as in clothes.

This is shown in the 1948 edition of "Accident Facts", statistical yearbook published by the National Safety Council.

The figures show falls were the commonest type of fatal accident 25 years ago, with railroad accidents running second.

Last year, motor vehicle accidents topped the list, falls were in second place and railroad accidents had dropped far back down the list.

Here are the major types of fatal accidents in 1913 and in 1947, as shown in "Accident Facts". They are listed with the worst killers first, and on down the scale.

1. Falls 1913 Motor Vehicle 1947
2. Railroad 1913 Burns and scalds 1947
3. Drowning 1913 Drowning 1947
4. Burns and scalds 1913 Railroad 1947
5. Motor vehicle 1913 Firearms 1947
6. Poison gases 1913 Poison except gas 1947
7. Firearms 1913 Poison gases 1947

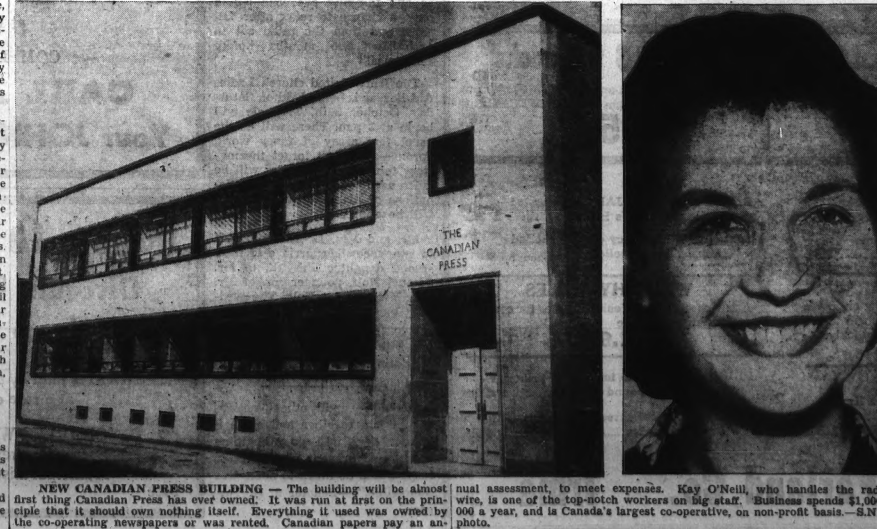

Tot, 22 Months, Smokes Cigars

SPRINGFIELD, Mass.—Mrs. Lawrence Phillips is resigned to her 22-month-old son's habit of smoking 12-cent cigars.

She said the baby, Lawrence Jr., began smoking cigarettes a year ago but switched to cigars recently. Two a day.

"We used to think it was cute," she said. "I don't like it now, but he quavars and carries on something fierce if I don't give him his cigars." At least, she said, he's a gentleman about it.

"He always uses the ashtrays," she said.

NEW CANADIAN PRESS BUILDING — The building will be almost first thing Canadian Press has ever owned. It was run at first on the principle that it should own nothing itself. Everything it used was owned by the co-operating newspapers or was rented. Canadian papers pay an annual assessment, to meet expenses. Kay O'Neill, who handles the radio wire, is one of the top-notch workers on his staff. Business spends \$1,000 a year, and is Canada's largest co-operative, on non-profit basis.—S.N.S. photo.

Men's Winter Footwear

Men's Rubber Overshoes

Four-buckle rubber overshoes with full rubber toe and fleece lining. Good heavy rolled edge sole. These are a good boot around the barn and water trough. Strong beaded all-around reinforcing. Priced at
Per pair **3.79**

J. C. McFarland Co. Irma

LOCALS

Mr. C. C. Riddle was a visitor in Irma on Tuesday last.

Mrs. Albert Knudson has just returned from a very enjoyable trip to North Dakota. Mrs. Knudson reports a bumper crop this year in Montana—the yield being such that the elevators and graineries can not cope with all the grain.

The thirteen pound turnip and 3 pound potato on display in the Co-op window were grown by Mrs. G. Knowles. Who says women are not capable of great things?

Mrs. L. Adamson has undergone a second operation in the Wainwright hospital. We are glad to hear that her condition is good and that she expects to be home shortly.

A farewell tea for Mrs. E. Elliot was held in the Irma United Church on Friday last. A good gathering of friends and neighbors attended. After some entertaining, games were played, Mrs. J. C. McLean, on behalf of those present presented the guest of honor with a lovely cameo pendant. Mrs. Elliot and her son Arthur are leaving Irma for Vancouver. Their many Irma friends wish them every success and happiness.

A general meeting of the Irma Curling club will be held at the Rink house on Thursday, November 4th at 8 p.m.

All parents and friends of the United Church Sunday School are cordially invited to attend a meeting in the church on the evening of November 3rd at 8 p.m. This meeting is an opportunity for the parents and teachers to have a get-together and a chance for all to meet and discuss their various problems with the Rev. J. Morris, secretary of Religious Education for this province. Games, some musical numbers and lunch will be provided by the teachers and officers.

Our sympathies go out to Mrs. C. Ferro whose mother, Mrs. J. M. Mann passed away in an Edmonton hospital on Sunday, October 24th.

We understand that thieves broke into Mr. M. McCune's store at Jarrow early Sunday morning and removed the safe which contained a considerable sum in cash and cheques. The empty safe was later abandoned in a field where it was found by Martin Lovig. Police are bending every effort to locate those responsible for this robbery.

The November meeting of the Senior W.I. Girls' Club will be at Mrs. Peterson's home on November 1. Hostesses: Miss Touchette and Winnie Thurston. Roll call: an amusing incident or an embarrassing moment from your own experience. Time: 8:00, sharp.

Miss Iris Brown of Banff spent last weekend here at the home of her brother, Mr. S. M. Brown.

Mr. and Mrs. Kjos of Cadogan are visitors at the home of their daughter, Mrs. Cliff Smallwood.

The Battle River W.I. held a very successful Tea and Bazaar here last Saturday.

We were just rejoicing over this wonderful Indian Summer weather and thinking everyone would have a chance to relax after fall work and then the radio cut in with "Just two months before Christmas!"

The Irma United church Ladies Aid Bazaar is being held on Saturday, October 30th. The sale will begin at 3 p.m. There will be the usual fine array of fancy work, aprons—and don't forget the mystery table. The tea tables will be laden with good eats for which donations of pies and other goodies will be appreciated.

Mr. and Mrs. L. B. King wish to announce the marriage of their second daughter Mary E. to Mr. Samuel Holt, younger son of Mr. and Mrs. Joshua Holt. The wedding took place in the church of St. John the Evangelist, Edmonton with the Rev. W. E. Harrison officiating.

"Canada and other nations should join together and make it known they will do everything possible to prevent war. That in itself would do much to make war impossible."—Senator J. G. Turgeon.

Regular Meeting Wainwright S. Div.

Minutes of the meeting of the Wainwright School Division No. 32 held on October 22, 1948.

Lawson—That the minutes of the last meeting be adopted as read. Cd.

The secretary was instructed to contact the Wainwright M.D. No. 61 with respect to the two gates on the road to the Killarney school.

Dr. Folkins—That the road to the Killarney school be given attention and that the gates be eliminated if at all possible before winter. Cd.

Health nurse's report for the quarter ending September 30:

Visits to schools	14
Pupils inspected	107
Classroom talks	8
Consultations with teachers	20
Consultations with parents	10
Welfare clinics	11
Attendance—The school	127
Infants	120

Guidance clinics will be held at the divisional offices every two months. Dr. Schragg's next visit will be on December 14, 1948.

Dixon—That Miss Tweedy's report be adopted. Cd.

Tenders re Cresthill school out-buildings are being held in abeyance until the next meeting of the board on November 23.

Superintendent's report included the following recommendations: Bus regulations as drawn up by the divisional office be placed with all busses in operation in the Wainwright school division; Evening adult classes will be held in the Wainwright high school should registration warrant same.

Mrs. McLeod—That the superintendent's report be adopted. Cd.

Mrs. McLeod—That Miss V. Arthur's resignation as office assistant and librarian be accepted with regret and further that a letter of appreciation be written to Miss Arthur. Cd.

Dr. Folkins—That with the recommendation of the divisional superintendent and secretary Mrs. I. Roach be accepted as office assistant and librarian until June 30, 1949, at a salary of \$100.00 per month, beginning November 1, 1948. Cd.

We are pleased to advise that the new Metropolitan school is completed and was formally opened with a dance and card party on October 15. A very fine job has been done by Mr. J. Craig.

Lawson—That a letter of appreciation be written to Mr. J. Craig of Irma regarding the fine job that he has done on the new Metropolitan school. Cd.

Secretary was instructed to write to the department of education for permission to sell the old school building at Metropolitan.

Dixon—That the matter of the basement for the Cresthill school that the secretary write to Mr. E. building at Ribstone be left in the hands of Dr. Folkins and further

Wedding Bells

THURSTON—PUGH

A wedding of local interest took place on Thursday, October 14, at 2:00 p.m. in St. Thomas Anglican church, Wainwright, amid a setting of autumn flowers when Rev. F. E. Smith read the marriage vows uniting Florence Eva, daughter of Mr. and Mrs. M. H. Pugh of Hope Valley and Ronald Thurston, son of Mr. and Mrs. F. T. Thurston of Irma.

Given in marriage by her father the bride was lovely in a floor length gown of white sheer. Her headress and veil were worn by her aunt over 20 years ago. She carried a bouquet of red roses.

Attending her sister as bridesmaid Miss Ellen Pugh chose a floor length gown of pink sheer with matching veil held by baby pink roses. Her bouquet was of shaggy mums.

Mr. Ivor Thurston supported his brother as best man and Messrs. George Pugh and Roy Burton acted as ushers.

Following the wedding ceremony a reception was held at the home of the bride's parents in Hope Valley. The rooms were fittingly decorated with pink and white streamers and the bride's table was centred by a three-tiered wedding cake.

For her daughter's wedding Mrs. Pugh wore a black crepe dress with black accessories and corsage of pink carnations while Mrs. Thurston chose a navy blue dress with matching accessories, her corsage was also of pink carnations.

Toast to the bride was proposed by Rev. Smith and responded to by the groom.

After a wedding trip to Jasper and Edmonton, the happy couple will take up residence on the groom's farm at Irma.

"It is a community responsibility to assist in awakening public regard for released prisoners, of whom approximately 700 under 25 years of age are returned to free life in Canada each year from the penitentiaries alone."—J. A. McLaughlin.

"The rising costs of higher education are reflected in the new schedule of fees."—Dr. M. M. MacOdrum.

Larson of Ribstone re same. Cd.

Dixon—That accounts be paid in the amount of \$28,065.44 and that the same be recorded in the minutes of this meeting. Cd.

A schedule of annual meetings for the respective sub-divisions in the Wainwright school division No. 32 will be announced through the local papers at an early date. The nomination meetings will be held this year in sub-divisions 2, 4 and 6, respectively.

Lawson—That we adjourn. Cd. Next meeting of the board November 23, 1948, at 9:00 a.m.

O. Griffiths, secretary.
